Human Resource Manual Policies and Procedures 2023

PREFACE

Any professional institution, aspiring for growth and development in the field of education, should have a clear vision of its policies and procedures for the furtherance and fruition of its activities. Notwithstanding good infrastructure in terms of buildings, laboratories, staff and other amenities, over-all academic achievement will be painfully low if the procedures, duties, responsibilities and target of every member of the teaching faculty and other employees are not clearly defined and strictly adhered to.

Individuals can put in their best efforts and direct their energies to the total fulfillment of their tasks, only if their duties and responsibilities are clearly known to them. Efficient functioning, achieving the targets, building individual profiles, avoidance of confusion and creation of good rapport with colleagues are possible only if the individuals are fully aware of the procedures and policies.

With this perspective in view, comprehensive, Human Resource norms, guidelines, procedures, duties and responsibilities for various activities have been conceived and given shape to by the combined efforts of the head of the institution and the management.

It is hoped that strict observance of these procedures and achievement of targets will eventually turn every teacher and employee into a role model to be emulated by every student of this Institution. It is also the earnest hope of the management that every member of the teaching faculty and all the employees will put in their right effort to give a positive direction towards synthesizing and imparting cost-effective quality technical education of an exceptionally high standard, for molding the personalities of the future engineers.

ANNEXURE D
SUGGESTIONS FOR GOOD TEACHING

1. Revise the subject topics for at least 1 hour in your room before going to the class. Write down the points to be covered in the class and use the same to teach.
2. Do not take the text-book to the classroom and read or dictate from the book to the students.
3. Always be on the stage near the board and talk facing the students. Raise your voice such that the students at the back benches are able to hear you.
4. Make the students compulsorily to occupy the front benches and leave the back benches vacant so the students can hear you better.
5. Write down the topics to be covered on the black board neatly and teach in that sequence.
6. Ensure that you have driven home the points. A simple feedback will give you a clear picture.
7. A pep talk at intervals and a piece of advice will go a long way to develop the students' overall skills.
8. Attract the students' attention towards your teaching by sequencing the topics correctly and using simple language to present them.
9. Never go to the classroom empty handed. Always carry one or two sheets of prepared notes or lecture notes.
10. Write down important principles, derivations, worked out examples on the board neatly and ask the students to take them down in their notebooks.
11. In the last 10 minutes, give an overview of the topics covered and dictate probable questions. Plan your lessons by giving lecture notes and citing the page number in the textbook.
12. Do not accept on any account to take the class of your colleague if he is present in the college.
13. Refer standard text books. Always discuss with your colleagues in case of doubts.
14. Be always student friendly and use pleasing language.
15. Give weak end assignments compulsorily and ensure that the students complete the same.
16. Whenever guest lectures are arranged, the relevant subject teachers should make it a point to attend. This will go in a long way to understand the teaching method from an experienced professor.
17. If a student in the class is indifferent, do not ignore him. Pay special attention to all such students and interact with them during your teaching session.
